The damage done the Northern Centre

The damage done the Northern Central railroad has been repaired, and regular trains from Harrisburg and Baltimore commenced running to-day, leaving Harrisburg at 1 o'clock p. m.

The Philadelphia, Wilmington and Baltimore railroad has been running trains through to Baltimore to-day. These, with the Washington railroad, were the only ones injured by the rebel raiders, and as these have all been repaired and put in running order before the raiders were well over the Petomac, the injury done them could not have been very great. Letters from washington state that a unit-ber of citizens of that city were found with the rebela beyond Fort Stovens. One of those was wounded, and being well known to everal clerks of the Departments their wrath against, him was so great that for aone time his wounds were left undressed. Now that the raid is over, Governor Brad-

Our reporter left on Saturday morning. He witnessed the whole rebel movements in Hagerstown. He was present at several conversations between Gen. Causland and one of the citizens. The spokessan of the council and citizens was Col. Schley, sided by Mr. Seyster and several others who occupy a conservative position—so conservative, indeed, that they lean a little over perpendicular on the rebel side. When the demand was made for \$0,000, Mesars Schley and Seyster called upon Gen. McCausland and declared their inability to raise the money and ciothing. The insurgent citled—a fierce, middle-size man, with red, bushy whiskers—answered them in the following rather emphatic than poetical manner; "By J—C——fifyou don't have the money and ciothing lby 5½ o'clock this svening I will burnevery house in town if it costs me my own life and that of all my consumed!" so much more important than the individual and State debts which formed the basis of the local baths, that like Moses' red it about a vallet up the others. This is realized. The people have in loans and in currency invisted \$1,800,000,000 in the government of the United States, that being the ment of the United States, that being the amount of the assignal debt. This is at the least six times the numerate they have invested in the local banks. In any conflict of interest, therefore, between the two, it such there were, it is ordered that the former shust preponderate. Banking consists in using debts has security for trusts and deposits, and as a basis of discounts and tomat. When State and individual debts were all we had, it was natural to use them as the basis of banking. But shem these amount to but 250,000 000, while the national debt expands to \$1,800,000,000, if it indly to suppose the country will continue to bank on the leaser capital. will continue to bank on the lesser capital, while five times its amount falls valueless for want of any use to which to put it.

system as inimical to their profits. Have they gained or lost by their opposition? Had they consented to Mr. Chase's plan, a tax of say two per cent on their circulation of \$178,000,000 would have caused the with-drawed of their paper at a total cost to them, and revenue to the Government, of \$3,500,000. A few of them whose circulation even then exceeded their capital would have exploded, by which both they and the country would have made a profit compared with their present states. We have in the Northern States a punce-on the rebels-own-terms party. It is yet to be decided at the Calcago Convention whether the rebels-own-terms party. B is yet to be decided at the Calago Convention whether it will control the "Democratic" organisation or not. But at present it influences the former "Democratic" party extensively, rlaims to wear its name and control its pouncils. If it shall succeed in enforcing this claim as Chicago, the "Democratic" organization will lose that small portion of the patractic element of the people which still adheres to it, and the imms "Democratic" will pass, at least for the present, out of American politics. By no stretch of courtesy can the American people extend such a term to those whose only bond of cohecion is a willinguess to dissolve the Union for the sake of upholding davery. By no stretch of impudence can they claim it. Measting, honge to be mourats councy complain so, long as they allow these Copperheads to control their actions and speak in their fame, if the entire "Democratic" party is set down as Copperhead, and in favor of "peace at any price." For we are all in favor of peace. The difference lies solely in the price we are willing to pay for it. The Union party and the present Administration desire peace on the basis of the submission of the rebels to the Constitution or have of any State to the constitution or have of any State to the contrary not withstanding." The question whether any laws are Constitution is to be decided only by the Supreme Court.

But this the Copperheads say is not a peace policy, but a war policy. That of course de-

denies of debt. Upon three as a basis, with a small margin of specie, naver sufficient three death and so if the Sorthern States had issued a paper currency amounting to \$175.00,000. This war they were never called on to redeem, except during a panic, in which case they suspended redemption, as that they enjoyed a practically irredormable loan from the people of \$30 per head in their circulation alone. This was, perhaps, doubled by their deposits, which, as received, went out again in the form of idams and discounts. As each of these sours ces tended to infaste the other every tenter to offer, viz., peace on the basis of the constitution, and as the rebels have never constitution of the Union, and as the Copperheads want the work of the Constitution of the Union, and to revent the aftern no delt of importance, the only basis on which banking could be done seemed to be the individual and State debts which formed the capital stock of three banks, and the system of Boal banking monopoliced the unacted in interest of the Contains to the decided only by the Supermon Court.

But this the Copperheads as a is not a peace policy, but a war policy. That of course depends upon the rebels. If the gebels dealer policy, but a war policy. The two courts are war, it is war. Now the Copperheads like ourselves, if in office, must either accept on the ourselves, if in office, must either accept on the power to offer, or fight to get better. As the President as already of the constitution, and as the rebels have never offered any terms not based on a discussion of the Union, and to revent the dissolution of the Union, and to revent the dissol want the Union dissolved on the rebels' own terms. What are they? The Richmond Au-quire, official organ of Jeff. Davis, lays them down as follows:

"Becognition by the enemy of the independence of the Confederate states.

"Withfrawal of Yankee forces from every food of Confederate ground, including Kentucky and

of Confederate ground, including Accuracy and Missouri.

Withdrawal of Yankee soldlers from Maryland, until that State shall decide, by a free voice, whether she steal remain in the old Union, or ask admission into the Consederacy.

Consent on the part of the Federal Government to give up to the Confederacy its proportion of the navy as it stood as the time of secession, or to pay for the same.

Yielding up all presentions on the part of she Federal Covernment to that portion of the old Territories which lie west of the Confederate States.

Federal Gyrerminant to tast portion of the old Territories which ills west of the Confederal States.

An equitable settlement, on the basis of our absolute independence and equal rights, of all accounts of public decire from inviting measures.

These provincies, we apprehend, comprise the mistings of while we must require before we lay down one arms.

Every democrat and copperhead are either in favor of granting these terms or of fighting for better. There is but one real question before the country. Shall we sight or back down? Those in favor of fighting will go for Lincoln and Johnson, those in favor of backing down will oppose them.

Yet the Chicago Tesse gives the following charming picture of Chicago virtue:—Boys neglect their achesibooks and just surroughtions linerviews with equally amorous mads. Chicago Cribune

"Very carnestly, sir, and always have done to."

The rebel General beckened to a sergeant who stood near him. "Bring a musket for this man," said he, "and take him into the ranks."

The "sympathizer" opened wide his ever, but slood mate with horror. He "couldn't see it" in that light, He stammered out at last, "Oh! I didn't mean that, General I don't want to fight. I want to entertain you and your sass while you remain here, and to show you that I am your friend."

The rebel General contemptacesty informed him that they interpreted sympathy only in its literal sense. He had claimed to sympathize with them, and they intended to avail thenisselves of his good will. A string of wagons was at once trotted on, driven to the sympathizer's property, and in the same afternoon he was stripped of everything. The rebels earried off all his cattle, sheep, hogs and smaller live stock, removed all his lay and wheat crop, leaving his barns utterly empty. The cavalry horses were turned into his growing oats, and his corn was cut for fodder while on the march. The sympathizer was detained nuffi all was done, and was then released with thanks for the sympathy he had manifested. J. The circular of March 30, 1854, above referred to, will continue in force, so far as applicable, until new regulations are issued. The bond for transportation of spirits and coal oil will be taken by the collector, as heretofore, but the applicant for a permit to remove spirits and coal oil is no longer required to swear that "the spirits or oil are designed for transportation to the said port for exportation," dg. The same form of bond, with the propet changes may be taken for the removal of tolketo, and for the removal of spirits for redistillation.

Section 66 of the act of July 1, 1862, was not re-enacted, and, therefore, spirits can no longer be shipped from one district to another in bills of lading.
